GICOM CS19

GICOM CS19

PB/R3/161216/GICOM CS19

GICOM CS19 is a highly purified natural rubber latex compound preserved with ammonia. It is specially designed for can sealant applications, particularly for the beverage industry, where the requirement on low residual chemical and CS₂ is of importance.

1. TYPICAL PROPERTIES

Total Solid Content (%)	-	60.35
Alkalinity (%)	-	0.65
MST @ 55% TSC (sec.)	-	2400
Coagulum Content (ppm)	-	50
B/F Viscosity, 2/60 at 26±2 °C (cps)	-	70
pH	-	11.30

2. APPLICATION

GICOM CS19 has a wide application especially in adhesive, casting, lamination and binding applications.

3. PACKING

GICOM CS19 is packed in non-returnable, internal-lined metal drums of net weight 205kg or delivered in larger bulk quantities using suitable tank containers

4. STORAGE

It is recommended that this product be stored in a sheltered premise, away from direct exposure to sunlight or subjected to temperatures above 35°C, but also not in extremely cold or freezing conditions. Some creaming of the product may occur over a long storage period, and if this has happened, stirring or gentle agitation is required to re-disperse the cream into the bulk of the latex before use.

A properly stored product should have a best used period up to 6 months. Longer storage than this period is however not recommended.

5. TECHNICAL SERVICE AND INFORMATION

The GETAHINDUS TECHNICAL TEAM comprises of qualified and experienced personnel. All R & D works are carefully thought of and meticulously planned when developing new products and materials to suit customers' requirements. All technical information and samples for evaluation are readily available. For any enquiry, please contact our Sales & Marketing Department.

6. HEALTH HAZARD AND SAFETY

GICOM CS19 is an ammoniated latex concentrate and hence the normal precautions taken in the handling of ammonia solutions must be strictly followed. It should not be ingested or consumed. Avoid direct contact with the skin and eyes in particular. If latex is accidentally splashed onto any part of the body or eyes, wash the affected area immediately with plenty of running water, and seek medical advice if there is pain or sign of redness.

No adverse physiological reaction has been observed in the use of this product when it was handled correctly and used in the manner suggested above.

GICOM CS19 complies to EU Regulation 10/2011 on plastic materials and articles intended to come into contact with food and FDA's Code of Federal Regulations, under subchapter B, part 177 (indirect food additives: Polymer) and part 175 (Indirect food additives: Adhesives and components of coating).
